STRENGTH, STABILITY, AND SAFETY: These words accurately describe the X-Deck work platforms. The easy to use, one-piece platforms are lightweight and portable. They fold flat for ease in carrying and storage. The wheel kit option allows you to move the platform with a finger. They set up in seconds and by attaching a plank, you can have continuous low-level scaffolding in a snap. Adjusting the height also takes just seconds and allows you to work at a safe, efficient and comfortable level. Our lowest setting is only 16", which is great for that little extra reach and our highest setting is 6' 10" that allows a 5'10" person to reach over 14'.

These lightweight, one-piece, anti-tip, portable platforms are height adjustable and set up fast and easy. The lift assist spring makes set up easy. Work longer with less fatigue and at a more comfortable height and footing than traditional and specialty ladders.

Value-Investment:

From a survey of users, we found that most people save from 20 minutes to 2 hours per day by switching to the X-Deck Platforms. Using a shop rate of \$50.00/hr. and using the low estimate of 20 minutes per day, the platform would create a savings of over \$4100/yr., per platform. Your yearly savings with minimum wage employees would be between \$1200-\$2500 per year by using the X-Deck platforms.

Cost Savings: The X-Deck Platforms normally outlast traditional ladders by up to 10 times. In addition, your added safety of this platform will normally reduce workman's compensation and other related injury expenses.

"...most people save from 20 minutes to 2 hours per day by switching to the X-Deck Platforms"

The insurance industry has estimated over 600 people a year die in North America from ladder falls and over 240,000 people are taken to emergency rooms with serious

injuries. With proper use of the X-Deck Platform we can practically eliminate these deaths and injuries.

The X-Deck Platforms are Certified, Tested, and Proven.

Compliance with OSHA, ANSI and CSA International Standards.

To choose a Pro-Line X-Deck, first choose the height (# of steps), then choose deck width (18" or 36"), and finally decide if you want standard steps or XL steps (only available for 18" models). The X-Deck comes with the standard handrail. Specialty Handrails, Accessories, and Extension Planks are available for all models.

This is the **3 and 4 Step X-Deck** from the Infomercial. Lightweight and portable, perfect for your home and small business. The X-Deck sets up in seconds and will make your jobs, big and small, more efficient, easy and most importantly safe.

Model	3-Step Light	4-Step Light
# of Height Settings	4	5
Maximum Height	40"	52"
